

## **INPATH-TES Kick Off Meeting, at CSIC Office, June 2015, Brussels, Belgium.**

It is our great pleasure to introduce our INPATH-TES - an EC funded project (HORIZON 2020 European Union Framework Programme for Research and Innovation for 2014-2020). Our goal is to create a network of universities and research institutes to implement a joint PhD programme on Thermal Energy Storage (TES) technologies. The final result of such a network is to educate professionals on these technologies for the European research and industry institutions. The partners in the proposal will be the core of a future larger network of excellent R&D institutions, and industries for co-funding and industrial placement, sharing infrastructure capacities, and enhancing mobility of students.
